

# OPPORTUNITIES FOR SUPPORT

We know that when we find a plant, or catch an animal, that it wasn't just skill, hard work or the tools used to harvest it. We know that it gave its life to us so that we would survive. By fostering a good relationship with the land, by taking care of it, it will always be generous to us. We thrive along the coast, the riverbeds and in the Bering Sea, in part because it is here we find sea mammals and fish. And they have always been generous to us. By donating to the Kawerak Cultural Center you can help us thrive.
