JOINT ENTITIES RESOLUTION

Native Village of Shishmaref
City of Shishmaref
Shishmaref Native Corporation

JOINT RESOLUTION #14-01

WHEREAS, the Native Village of Shishmaref IRA Council is the federally recognized governing body of the tribal members of Shishmaref, Alaska; and,

WHEREAS, the Shishmaref City Council is the municipal governing body of Shishmaref, Alaska; and,

WHEREAS, the Shishmaref Native Corporation is the village corporation established under ANCSA; and,

WHEREAS, the purpose of the Native Village of Shishmaref IRA Council, Shishmaref City Council, and Shishmaref Native Corporation Board are to serve the people, community, and businesses of the tribe by promoting economic opportunities that improve the economic, social, and environmental quality of life; and,

WHEREAS, the Native Village of Shishmaref IRA Council, Shishmaref City Council, and Shishmaref Native Corporation Board are responsible for the planning and implementation of economic development activities for the tribe in Shishmaref; and,

WHEREAS, the Native Village of Shishmaref IRA Council, Shishmaref City Council, and Shishmaref Native Corporation Board are responsible for the development and implementation of a community economic development strategy to guide the economic growth of the village in order to help increase local employment opportunities, foster a more stable and diversified economy, and improve the quality of life for residents, while maintaining the cultural heritage of the community; and,

WHEREAS, the LEDP provides the factual data support necessary to qualify for assistance in funding local projects; and,

WHEREAS, the Native Village of Shishmaref IRA Council in a Joint Meeting with the City of Shishmaref and the Shishmaref Native Corporation, with assistance from Kawerak Community Planning and Development Program staff, has updated its five-year LEDP that states the community's values, goals, objectives, and strategy necessary for guiding future growth and economic development of the village; and,
WHEREAS, the 2013-2018 economic development priorities listed in this LEDP were developed, reviewed, and approved by the community during a joint public meeting held on December 12, 13, and 14, 2012; and,
WHEREAS, we ask all public, private, and non-profit entities serving our community to recognize and use this plan; and,

NOW THEREFORE BE IT FURTHER RESOLVED, that the Native Village of Shishmaref IRA Council, Shishmaref City Council, and Shishmaref Native Corporation Board approves and adopts the five-year Shishmaref LEDP 2013-2018 and priorities for the tribe in Shishmaref, applicable between July 1st, 2013 and June 30th, 2018.

NOW THEREFORE BE IT FURTHER RESOLVED, the economic development priorities listed below for the Native Village of Shishmaref as reviewed, updated, re-prioritized, and approved on December 14th, 2012 are:

- Multi-purpose building
- Cultural Center & Activities
- Youth
- Housing Apartments, Rentals
- Economic Development
  - Gift Shop
  - E-commerce
  - Etc.
- Community & Regional Technical Training Center
- Alternative Energy Development
- Human & Health Services
  - Bullying
- Water & Sewer

CERTIFICATION: I certify that the foregoing resolution was adopted at a convened meeting of the Native Village of Shishmaref IRA Council on February 12, 2014 at which a quorum was present.

President, Native Village of Shishmaref

1.0 Purpose of the 2013-2018 Local Economic Development Plan (LEDP)
The LEDP is a critical step in the on-going development of the tribe and its efforts to improve community conditions and the well being of its members. This plan is structured to:

- Provide the community with a complete inventory of existing demographics, races, social conditions and services, economic conditions and activities, public services provided, and public and private facilities;
- Equip the community with the basic informational tools of local planning that accurately show land status and ownership as well as traditional resources and subsistence areas;
- Provide implementation strategies for development priorities including land use, public facilities and services, capital improvements, economic development and community governance;
- Place emphasis on the crucial development issues: economic and resource development, land use planning and needs of the community with regards to infrastructure, and priority capital improvement projects;
- Involve key decision makers to assist in the identification of common goals and direction to achieve those goals.

2.0 Planning Process and Public Involvement

2.1 Planning History and Accomplishments in Shishmaref
The Kawerak Community Planning and Development Program (CPD) worked with the Community of Shishmaref in developing its 2004 LEPD. LEPDs analyze local conditions, identify problems and opportunities, and develop goals, strategies and outcomes to address community issues, on-going development, and future development. Below are some of the major accomplishments toward these goals since Shishmaref’s LEDP Top Priority Projects were updated in 2008.
1. Relocation & Erosion
   - Seawall partially built - about half
   - Plan changing - may stay & build protective infrastructure all around island - over next 20 years
   - The City received $150,000 planning grant. Once spent, door opens for funding to hire someone to plan & coordinate further progress.
   - City received new loader to maintain seawall to slow erosion.
   - 2005 - reconnaissance study grant received to build gravel haul road to mainland. Study incomplete - It is on STIP inventory though.
   - State recognizes need & has it as emergency priority.

2. Health/sanitation
   - Clinic renovation due in summer 2013.
   - CDBG for multi-purpose applied
   - Have dental health aide
   - Received snowmachine for emergencies for clinic
   - Better city service on honeybucket haul/emptying
   - Running water/flush toilets - about 1/3 of homes have some form of running water (toilet, sink, shower)
   - AVEC waste heat recovery grant
   - Might get funding to protect sewage lagoon from storms - ANTHC looking at it on 12/13/12.
   - There's funding for waste heat project for city garage (houses the water & sewer transport equipment, fire truck, etc.) and maybe city office and clinic.
     - IRA does IGAP - backhaul, recycling, ewaste disposal, etc.
     - Sanitation Master Plan completed by ANTHC.
   - Water plant upgrades - Washeteria has clean clear water now.
   - Emergency Planning improved (training, new radios - VHFs)
   - Sanitation road improved so now faster less bumpy driving to sewage lagoon.
   - Landfill reorganized into section for larger items, recyclables, etc.
   - Killed some of the foxes contaminating the water

3. Fire Safety
   - Got a fire chief
   - New hoses (for drinking water from tank to washeteria) & extinguishers
   - VPSO upkeeps fire-fighting equipment & helps with fires

4. Economic Development
   - Multi-purpose building voted for by community at recent planning meeting
     - Would house several components of economy
     - Cultural center
     - Arts & crafts marketing - skin sewing, carving, etc.
     - Museum
   - IRA agreed to use Title VI for new homes but no new homes from BSRHA yet (supposed to be 20; now supposed to be 7; waiting for years)
   - Native Corp has parcels set aside for new development - 14 (c)1
   - BSRHA does annual study of housing needs - SHH needs 100 more units

Shishmaref Local Economic Development Plan (LEDP) – 2013-2018
• All BSRHA homes were leveled
• IRR funding improved city streets last summer 2012
• Seawall buffer/extension (west side & lagoon on east side)
• Local resources available for independent action: equipment; skills; sand/gravel etc. From prior projects for back-fill
• Ongoing runway patching
  o Runway will be repeated in 2014.
• AEA - Tank farm will be replaced 2013
  o City, Native store (IRA)
    ▪ Both will be consolidated into 1
    ▪ Old will be removed
• Finding out how to fund re-opening of the tannery
• Alaska Building Science improved energy use (fuel, lights, etc.): City Office, Friendship center, IRA, Community Hall, School, assessments for tannery & IRA - contracted energy audit with BSDC (Bering Strait Development Corporation)
• PCE fully funded
• Cemetery renovated
• New refrigerated morgue funded & materials - now just needs to be built
• Repatriation Act in 2012 - to get ancestral items back
• New apartment building (12bdrm apartment)
• Snack Shack
• Evacuation Plan developed - including emergency operation plan
• Wellness coalition - 3 yrs going - games, picnics, fun
• Hazard Mitigation Plan
• COOPS Plan (in case an entity office burns down, etc.)
• Eligible for certain funding opportunities now that the above plans are in place
• Elders Advisory Committee
2.2 Planning Committee & Staff Description Realizing that changes within the community and some current public service facilities are not adequate to achieve program parity, the City of Shishmaref, the Shishmaref IRA Council, and the Shishmaref Native Corporation decided to update the Top Priorities and update the Local Economic Development Plan for the community. With assistance from Kawerak’s Community Planning and Development Program staff, public planning workshops were held on December 12, 13, and 14, 2012. A draft LEDP was written and presented to the joint councils for review. The plan, with approved priorities, was approved and adopted by joint resolution on May 2nd, 2014.

Members of Shishmaref LEDP Planning Committee, Dec. 14, 2012
2.3 Method for Plan Development and Components
The planning organizations in Shishmaref used a strategic planning process based upon:
- Technology of Participation methods developed by the Institute of Culture Affairs
- Denali Commission, United States Department of Agriculture, Rural Development
- Alaska Humanities Forum Community Strategic Plan Guide and Form

These methods are proven effective in encouraging full participation from diverse groups and are best applied within community-based settings. This process was implemented among the participant’s by brainstorming ideas individually, then reviewing among all participants confirming new resolves and decisions. The following foundational values or ground rules were applied during planning sessions:

- Participation: each person brings a different insight, perspective and knowledge that formulates the larger picture
- Respect: respect and honor each person’s views and ideas, empower each other
- Teamwork: each person works with everyone else in their role to accomplish the goals of the community
- Creativity: giving permission for the dialogue between the rational (mind) and intuitive (heart) perspectives, keep our eyes open, new ways of thinking
- Action: moving economic development towards local responsibility and accountability

The planning process was made up of three parts. Each component helped provide a comprehensive planning approach.
- LEDP Vision, Values and Goals - Developed the direction for the community’s social and economic development with an overall vision, guiding community values, and development goals.
- Implementation Strategies - Created planning steps that the community can take in the coming 5 years to begin the actions and movement toward the vision and development goals.
- Funding and Land Use - Identified potential funding and community investments to implement development goals. Identified potential sites for selection of projects requiring land.
- Recommended application of community values during implementation of development activities.

It is expected that the Local Economic Development Planning document should include:
- Community profile and assessment data
- Community vision, values, and goals
- Updated community priorities for community and economic development
- Top priority implementation strategies for guidance in community development projects
2.4 Comprehensive Development Status
As a second-class city in the unorganized borough, the city of Shishmaref has optional powers under the state law for planning, platting, and land use regulation within municipal boundaries. The City of Shishmaref has assumed some of these powers. As the federally recognized governing body of the tribal members of Shishmaref, Alaska, the Native Village of Shishmaref IRA Council shares some of these responsibilities and powers.

A Community and Economic Development Strategy (CEDS), a regional economic development plan, was updated for the Bering Strait Region communities in 2009 by the Bering Straits Development Council. The next full update is scheduled for 2013. This document can be found at: http://www.kawerak.org/servicedivisions/csd/cpd/index.html

Shishmaref published an LEDP in 2004. Many of the priorities turned into successful development projects that were completed.
**The Approved 2013-2018 Top Priorities**

The Shishmaref planning participants chose not to rank their Top Priority Projects. They see their Priorities as being interdependent without one being more important than another. Participants agreed that a circular chart of their Priorities is in line with their cultural perspective. This chart represents what is required for Shishmaref’s well-being as a whole, consisting of interrelated parts.
3.0 Community Descriptions

3.1 Location
Shishmaref is located on Sarichef Island, in the Chukchi Sea, just north of Bering Strait. Shishmaref is five miles from the mainland, 126 miles north of Nome and 100 miles southwest of Kotzebue. The village is surrounded by the 2.6 million-acre Bering Land Bridge National Reserve. It is part of the Beringian National Heritage Park, endorsed by Presidents Bush and Gorbachev in 1990. It lies at approximately 66.256670° North Latitude and -166.07194° West Longitude. (Sec. 23, T010N, R035W, Kateel River Meridian.) Shishmaref is located in the Cape Nome Recording District. The area encompasses 2.8 sq. miles of land and 4.5 sq. miles of water. The area experiences a transitional climate between the frozen arctic and the continental Interior. Summers can be foggy, with average temperatures ranging from 47 to 54; winter temperatures average -12 to 2. Average annual precipitation is about 8 inches, including 33 inches of snow. The Chukchi Sea is frozen from mid-November through mid-June.

3.2 History and Culture
The original Eskimo name for the island is "Kigiktaq." In 1816, Lt. Otto Von Kotzebue named the inlet "Shishmarev," after a member of his crew. Excavations at "Keekiktuk" by archaeologists around 1821 provided evidence of Eskimo habitation from several centuries ago. Shishmaref has an excellent harbor, and around 1900 it became a supply center for gold mining activities to the south. The village was named after the Inlet and a post office was established in 1901. The City government was incorporated in 1969. During October 1997, a severe storm eroded over 30 feet of the north shore, requiring 14 homes and the National Guard Armory to be relocated. Five additional homes were relocated in 2002. Other storms have continued to erode the shoreline, an average of 3 to 5 feet per year on the north shore. In July 2002, residents voted to relocate the community.

It is a traditional Inupiat Eskimo village with a fishing and subsistence lifestyle. The sale or importation of alcohol is banned.
3.3 Government, Corporations, and Service Providers

3.3.1 Shishmaref IRA Council
Native Village of Shishmaref
PO Box 72110
Shishmaref, AK 99772
Phone: 907-649-3821
Fax: 907-649-2104

The terms of the council seats shall be as follows:
Seats A and B: 3 year terms
Seats C and D: 2 year terms
Seats E, F, and G: 1 year terms

Native Village of Shishmaref IRA Council - 2012
President (C): Karla Nayokpuk
Vice President (F): Stanley Tocktoo
Treasurer (D): Donna Barr
Secretary (A): Howard Weyiouanna, Sr.
Member (G): Edwin Weyiouanna
Member (B): Reuben Weyiouanna
Member (E): William Jones, Sr.

Other Native Village of Shishmaref Staff - 2012
Tribal Coordinator: Jane Kakoona
Comptroller: Laura Weyiouanna
Bingo Coordinator: Ruth Nayokpuk
Bingo Assistant Coordinator: Fannie Weyiouanna
Grant Writer: Tony Weyiouanna, Sr.
Environmental Program Coordinators: Richard Kuzuguk and Sharon F. Nayokpuk
Community Hall Janitor: Ralph Olanna
Clinic Janitor: Lena Weyiouanna
After School Activity Coordinator: Karen Olanna

IRA Services:
- Indian Child Welfare Act (ICWA)
- EPA/SAP (IGAP)
- Bingo
- Cannery
- Native Store (ANICA)
- Tribal Enrollment
- Indian Reservation Roads (IRR) Road Maintenance
- Bering Straits Regional Housing Authority (BSRHA)/NAHASDA housing funding
- Wellness Coalition (Suicide Prevention)
- IRA receives lease payments for the clinic from Indian Health Services (IHS), but the City owns the clinic building.
3.3.2 City of Shishmaref
Municipal Services, Facilities, and Utilities:
- Water & Sewer Flush/Haul
- Watering Point
- School Water
- Honeybucket Hauling
- Electric (AVEC)
- Refuse Collection
- Landfill
- Police
- Fire Department
- Equipment & Building Rentals
- Road Maintenance
- Bingo
- Roads
- Bingo/Pull Tab

</table>
3.4 Community Infrastructure

3.4.1 Housing
Shishmaref’s housing is currently inadequate for its needs. The Alaska Housing Assessment defines overcrowding as less than 300 square feet per person in a home. Multi-generational extended families living in homes make overcrowding common in Shishmaref. The extent to which families double up is difficult to measure because not all households apply for assistance or renew paperwork. Thus, the problem might not appear as dire to regional and state agencies as it appears at the local, village level. Convictions or inadequate work also serve as barriers to assistance and housing construction.

Another result of the housing shortage is that professionals like Physician’s Assistants do not have permanent residence in Shishmaref.

BSRHA does an annual study of housing needs. Shishmaref needs 100 new homes. The Native Corporation has parcels set aside for new development as per 14 (c)1. The IRA agreed to use the Title VI loan program for new homes, but construction has yet to begin. 20 new units were planned. That number has been reduced to seven.

Most homes in Shishmaref have structural problems that need repair. Mold affects older and new homes. Many have issues with flooring, electrical wiring, and water & sewer. Some floors sag causing drafts. Homes do not have fire escapes. 1/3 or fewer homes have some combination of running water including toilet, sink, and shower, but most use honey-buckets.

Opportunities for weatherizing homes are limited. Some residents make too much income to qualify for weatherization grants. But they do not have enough income to afford weatherization on their own.

BSRHA guarantees repairs during the first year under contract. But home-owners are responsible for costs beyond that. BSRHA has installed more efficient heating systems in 41 homes in Shishmaref.

Some residents express concern to have better understanding of regulations required for finance and other options.
The following housing data, unless otherwise noted, is from the 2010 U.S. Census and based on a total population of 583.

**Housing Characteristics:**
Total Housing Units: 151
Occupied Housing (Households): 141
Vacant Housing: 10
Vacant Due to Seasonal Use: 1
Owner-Occupied Housing: 84
Renter-Occupied Housing: 57
Avg. Household Size: 4
Family Households: 111
Non-Family Households: 30
Pop. Living in Households: 563
3.4.2 Schools
The Shishmaref Native Corporation, IRA, and City each provide financial aid for college.

Educational activities for residents include:
- Seasonal trips to hotsprings to learn traditional skills
  - Survival
  - Butcher seal, walrus, caribou, etc.
  - Boating – there is one Umiak skin boat with airplane fabric for skin used to hunt Ugruk (young bearded seal) in spring and one traditional kayak frame in Shishmaref.
- Carving & Sewing
- Inupiaq Days – Three days in April with traditional demos/training including visiting teachers from other villages in the region
- Wellness picnic in July with traditional foods and games
- Christmas – winter traditional games like Eskimo Football & Baseball on December 31st; the football game is very rough and everybody is a good sport about it. The losers serve coffee & cookies/refreshments.
- IRA SEP Youth Litter Patrol

Some of the opportunities available to high school students & graduates include:
- NACTEC
- Upward Bound
- RAHI

Life-long learning opportunities available for adults include:
- ABE/GED Adult Basic Education
- NWC – Learning Center in Shishmaref
- KOTZ Technical Center
- Community college in Barrow: Ilisaaviq – “Place of Learning” scholarships available
- Kawerak SYETP provides training for business/administration.

The Bering Strait School District operates schools in 15 villages in the Bering Strait region. The regional student population is 98% Alaska Native.

District Mission Statement:

The mission of the Bering Strait School District is to educate our children to become self-sufficient and responsible citizens through quality programs that express high expectations for all in a safe and supportive learning environment that respects our children’s heritage.
District Philosophy:

In accordance with state educational policy, the purpose of education is to help ensure that all students will succeed in their education and work, shape worthwhile and satisfying lives for themselves, exemplify the best values of society and be effective in improving the character and quality of the world around them.

Shishmaref School Phone: 907-649-3021

In 2012, there were 21 teachers and 192 students enrolled in P – 12 in Shishmaref School.

Shishmaref School Vision Statement:

The Shismaref vision is to create a safe & supportive learning environment where Inupiat values are respected, taught, and practiced as students engage in challenging and meaningful educational opportunities resulting in productive citizens who are lifelong learners.

Shishmaref School Mission Statement:

Through a collaborative effort involving community, students, and teachers, using quality educational programs, is to educate all students to become responsible, self-supporting, and productive members of our community, who strive to reach their maximum potential!

The school library is web-based. All items are digitally scanned into the system. Computers are all MAC. Having more space would make it possible to expand the book collection. The librarian would like more titles in the Alaska section like *Eskimo Adventure*, written by Edward L. Keithahn, a teacher in the 1930s; it is all about seasonal activities in Shishmaref that are still practiced today.

Shishmaref School has a Youth Leaders class. Students are chosen by student ballot and learn about opportunities for service in vital areas like local government. Youth Leaders help other students through challenging experiences and serve the community in ways including helping Elders with their needs, community cleanup, and community planning. The Youth Leader class students that participated in the LEDP planning meetings have a broad view of the issues their community faces and ways they can help.
The Shishmaref Northern Lights (SNL) and CHAMPS programs reward exceptional behavior that is above the school expected behaviors. Those that demonstrate acts of caring and compassion for others are acknowledged and awarded. The programs are having good results influencing students’ test scores, attendance, behavior, and achievement.

The school gym is open to the public at night.

Sometimes the school offers shop classes to the public.

The Shishmaref School needs larger facilities for the growing population. A new multi-purpose addition is planned that will provide new classrooms and a lunch area.

There is a Head Start Early Childhood Education (ECE) program serving children age three to five. Curriculum includes cultural activities like ice fishing, traditional foods, Eskimo yo-yo, and other themes each week. Art lessons include music, dance, and book-making. The grant for the certified ECE teacher ends in 2013. The certified instructor has a measurable influence on student performance.

**HeadStart Phone: 907-649-2128**

The Learning Center is a branch of University of Alaska Fairbanks’ Northwest Campus. It provides computers, internet, and phone service for students enrolled in Distance Education and Distance Delivery college classes. Kawerak’s GED and ABE programs are also administered there. The City of Shishmaref rents the building to the program.

**Learning Center Phone: 907-649-3011**
Learning Center Priorities:
- Outdoor lighting to help prevent students from slipping
- Cracks in the ceiling fixed to prevent bugs from entering in the summer
- Old carpet replaced with linoleum or hardwood to make cleaning easier
- Cracks in windows repaired
- Insulation improved to make building warmer and more efficient to heat
- More room for program equipment & supplies
- Storage room renovated so it is warmer and could be used as office space or testing area

Learning Center Personnel:
- Northern Regional Advisor: Annie Weyiouanna
- Academic Coordinator: Molly Snell

3.4.3 Water and Sewer
Water is derived from a catch basin on the East side of the island that collects rainwater and snowmelt. It is treated and stored in a tank for both community and washeteria use. In the winter, drinking water is also obtained from ice chopped from ponds on the mainland on both the East and West sides of the inlet, five to seven miles from Sarichef Island. Other summer water sources include rainwater collected from the roofs, and hauling water from the Serpentine River.

Washeteria Phone: 907-649-4781

Only the school, clinic, washeteria, and teacher housing have complete piped water and sewer service. Some homes have internal flush/haul systems. But most residents self-haul water and there are City honey-bucket bins available around town. The water tank does not always maintain enough water for personal use and emergencies like fires. Residents must conserve water at certain times of the year.
Water & Sewer upgrades since the publication of the last Shishmaref LEDP:
- Almost 1/3 of homes have had flush toilet, sink, shower or a combination of these installed.
- The sanitation road has been improved so it is now faster and less bumpy driving to the sewage lagoon.

ANTHC has completed the Shishmaref Sanitation Master Plan which is shovel-ready when funded.

Shishmaref might get funding to protect sewage lagoon from storms. ANTHC was scheduled to look at the site on 12/13/12.

There’s funding for an AVEC waste-heat project for the City Garage where water and sewer transport equipment are stored along with the fire truck.

**Water and Sewer Service Fees:**
- Laundry: $7-10 per load
- Showers: $3.50
- Water: $1/15 gallons
- Honey-bucket Haul Fees: $40 per month

**Water Distribution, Source & Treatment Systems:**

<table>

</tr>
</tbody>
</table>
3.4.4 Landfill

Shishmaref IRA runs an EPA/SEP backhaul program (IGAP) that plays a major role in removing unwanted refuse from the area. Large trash items old ATVs and refrigerators get taken away by barge. Batteries and many other items containing toxic substances are also removed.

The landfill has been reorganized into sections for larger items, recyclables, etc. There is a burn-box available for individuals to use at the landfill. Maintenance is challenging especially in the spring. The site is over-filled and needs expansion or a new site. IGAP had plans to put fencing around landfill but funding was lost.

The landfill road currently serves as a seawall for the runway.
3.4.5 Electricity

Electric Utility Name: Alaska Village Electric Cooperative (AVEC)
Utility Operator: AVEC
Power Source: Diesel
Kilowatt Capacity: 971.00
Power Cost Equalization (PCE) Subsidy: Yes
Total kWh Generated: 1627321.00
Power Cost Equalization (PCE) Rate: 38.29

3.4.6 Bulk Fuel/Alternative Energy

The community has an AVEC grant to fund a waste-heat recovery project to heat the City Garage where water and sewer transport equipment are stored along with the fire truck.

Alaska Building Science improved energy use in buildings including the City Office, Friendship Center, IRA Building, Community Hall, and the School. An energy audit was contracted with BSDC to determine what changes would have the most impact.
Shishmaref might be selected for a helium floating wind-turbine through the Emerging Energy Technology Grant Fund (EETGF).

Citgo has provided diesel for heat over the past few years. But an energy/heat assistance program increase would need to be established at the State House level of government.

**Fuel costs:**
- $7/gallon
- #2 diesel stove oil is almost $7/gallon. The average home uses about 200 gallons/month in the winter – 55 gallons every 5-7 days. Homes were designed for warmer climates and built with inefficient boilers installed.
- Propane is used for cooking-fuel. Blazo “white fuel” is a clean-burning fuel for lanterns and cooking. It costs $42/gallon.

**Fuel Tanks Currently in Use**
The AEA tank farm will be replaced in 2013. The City and Native Store tank farms will be consolidated into one in 2013. Old tanks that are unusable will be removed.

</table>
3.4.7 Existing Transportation Systems
Shishmaref’s primary link to the rest of Alaska is by air. A state-owned 5,000’ long by 70’ wide paved runway is available for charter and freight services from Nome. Most people use boats for trips to the mainland. 4-wheelers and snow-machines are the most common vehicles used on land.

There are only sand roads in the village. A small portion of the road to the runway is paved. A dirt/gravel road, which was built by the State of Alaska Department of Transportation, leads from the village to the dump and sewage lagoon.

Shishmaref has an excellent natural boat harbor. Around 1900, it became a supply center for gold mining activities to the south. Most people own boats for trips to the mainland.

The roads to the landfill and airport have been improved and are faster and less bumpy to drive on but need to be protected from erosion. Storms can wash away 20’ of land in a single hour and have been increasingly severe. The landfill road currently serves as a seawall for the airport. Kawerak Transportation Program (KTP) has detailed information concerning these issues.

The City of Shishmaref is responsible for street lighting, wind-erosion, run-off, and dust control within town. Improvements are wanted in all areas. Drainage is not built into the current seawall design. Without street, speed, or stop signs the City cannot enforce its safety ordinances. Streetlights cost $10,000-$11,000 to purchase and install. Funding possibilities are being researched.

Paving the road from the airport to the post office would make patient transport safer and easier. Currently, patients can get stuck in mud and bounced around with their IVs during transport. An airline terminal would provide a safe place for passengers, especially medical patients, to be out of the harsh elements while awaiting flights. Merchandise also gets left in the cold on the runway.

Airfare is too expensive for most residents to travel. Both the stores use by-pass mail for supply deliveries and there is no other choice. It is expensive even though it is subsidized and there is a 2000 pound minimum to use it.

Barge service is available from early July through September when the water is free of ice. Barge service is expensive; ½” plywood costs $78 per sheet to transport. Barges have to wait for weather to clear before they can land and only come to deliver fuel or when supplies are ordered for a major project. Receiving freight on a chartered plane is less expensive than by barge.

A taxi service or school bus would improve safety of students. Bears and wolves are threats and not always visible especially during winter darkness and snow storms.
3.4.8 Communications
Most residents have cell phones and most households have landlines, computers with internet service, and VHF radios. Internet access is available to the public at the Learning Center and sometimes at the School. Cell phone reception is weak sometimes and depending on location. Internet service is slow but expected to improve soon. Community announcements are made on the Native Corporation Cable Channel which sells advertising for $3/day. Bulletin boards are also used for local notices.

**Communications:**
- **In-State Phone:** TelAlaska & GCI
- **Long-Distance:** TelAlaska & GCI
- **Internet Service Provider:** GCI
- **Radio Stations:** KOTZ
- **Cable Provider:** Native Corporation
- **Postal Mail:** USPS
- **Deliveries:** Bering Air, ERA, and Ryan Air
3.4.9 Health Care
Shishmaref’s Katherine Miksruaq Olanna Health Clinic is a qualified Emergency Care Center. Critical health issues include substance abuse and suicide. Major recurring health problems in the community include diabetes, heart disease, cancer, and alcoholism.

The Clinic is busy and crowded. A 20’ extension is due in the summer of 2013. A morgue will be part of the upgrade. Two new rooms were supposed to be added on but the costs increased by 25% per year from the time the plans were made.

Housing for visiting practitioners is also needed. They stay at the clinic in spite of the need for more room.

An entirely new clinic was supposed to replace the existing one but would have taken 10-12 years to accomplish. Expanding the existing clinic was chosen instead.

3.4.10 Municipal Buildings and Municipal Heavy Equipment

**City Buildings:**
- City Office
- Friendship Center
- City Shop
- Old Pool Hall
- Water Plant
- Washeteria
- Pump-house
- Clinic
- Learning Center
- Garage
- Fire Hall

**City Equipment:**
- 960 loader
- Backhoe (broken)
- Truck (broken)
- Two 4-wheelers
- Two T-rex dump trucks (broken)
- Fire truck (needs some repairs)
- Track vehicle (needs some repairs)
- Two snow-machines (need some repairs)
- Code Red
- Cat (broken)
- Mule & Rhino 4-wheeler side-by-sides
- Crane (broken)
- Water & Sewer

![Shishmaref City Shop](image)
3.4.11 Tribal Buildings & Equipment

IRA Buildings:
- Community Hall
- Old & new tanneries
- Native Store
- IRA Office

IRA Equipment:
- 4 wheeler for SEP/IGAP
- Native Store has 4-wheeler and snow-machine for deliveries.
3.4.12 Public Safety

**Law Enforcement**
- Village Police Officer (VPO) is temporary, working four hours/day – City-funded.
- Barret Eningowuk, the Village Public Safety Officer (VPSO), is a State-funded law enforcement officer. There used to be two VPSOs. One resigned.

**Fire Department**
- Fire Chief receives $400 monthly stipend for service.
- Fire Department members volunteer.
- Not registered with State. Needs registration to qualify for assistance with equipment and funding.

**Search and Rescue**
- Volunteer members are the same as the Fire Department.
- 18 members divide into six teams of three according to who knows which areas best.
- Privately owned vehicles and sleds are used.
- City and IRA pay for rescues if State Troopers cannot. Trooper response might be too late if weather is bad.
3.4.13 Libraries and Museums, Cultural Buildings, and Social Events and Programs

Libraries
- Public library is closed due funding issues.
- Students have access to the school library.

Museums and Cultural Buildings
- A multi-purpose building is included in 2013-2018 LEDP Top Priority Projects, “Multi-purpose Building” and “Cultural Center & Activities.” It would house a museum and be used for marketing locally made arts and crafts. With the Repatriation Act of 2012, ancestral items will be returned to tribes.
- The Friendship Center has numerous social uses including Eskimo Dancing. It is used by all ages. It has been used for crafts like carving and sewing.

Singing and drumming provides rhythm for dancers in the Friendship Center.
Social Events and Programs

- Eskimo Dancing
- Seasonal trips to hot springs to learn traditional skills
  - Survival
  - Butcher seal, walrus, caribou, etc.
  - Boating – there is one Umiak skin boat with airplane fabric for skin used to hunt Ugruk (young bearded seal) in spring and one traditional kayak frame in Shishmaref.
- Carving & Skin-sewing
- Inupiaq Days – Three days in April with traditional demos/training including visiting teachers from other villages in the region
- Wellness picnic in July with traditional foods and games
- Christmas – winter traditional games like Eskimo Football & Baseball on December 31st; the football game is very rough and everybody is a good sport about it. The losers serve coffee & cookies/refreshments.
3.4.14 Cemeteries and Graves
The cemetery has been renovated as planned in Shishmaref’s 2004 LEDP Top Priority Projects.

![Shishmaref Cemetery and with Church in background](image)

3.4.15 Public buildings, lands, churches, parks, camps, and recreational areas
The land and water all around Shishmaref are used for hunting and harvesting.

There is a Lutheran Church in Shishmaref. ICWA and Village Based Counseling (VBC) offices are located there. The VBC administers a grant for residents, including children, to make crafts in the church.
4.0 Population and Growth Trends

4.1 Shishmaref Census Data
The following population data is from the 2010 U.S. Census, unless otherwise stated. Additional detail is available from the Alaska Department of Labor and Workforce Development, Census and Geographic Information Network and the U.S. Census Bureau's American Fact Finder.

**Population by Race:**

<table>

</table>

**Census History**

Population by Gender

- Male: 310
- Female: 253
4.2 Employment and the Economy
Subsistence plays and barter play major roles in Shishmaref’s economy. The population is mostly Inupiaq. Subsistence foods, hunted and harvested locally, ensure that food is available all year. Seal oil is the most important and is eaten with all foods. Subsistence foods are the largest part of the local diet and eaten at every meal. Store-bought food is supplementary.

The village location was settled because of the access to the ocean and the mainland for hunting and gathering. A large part of the Native diet consists of sea mammals. Residents rely on seal, fish, walrus, polar bear, rabbit, moose, caribou, reindeer, crab, berries, and a variety of greens. Reindeer herding has been challenging due to reindeer leaving with the migrating caribou herds.

Carved and sewn crafts are made and traded for other necessities. Visitors and local buyers purchase hand-crafted items for gifts and resale. The General Store buys crafts for resale. Some residents sell crafts on eBay, Facebook, and Etsy and some are interested in exploring “Alaska Made” opportunities. There is no e-commerce training in Shishmaref. But there is motivation and potential to form a coop to sell arts and crafts.
The tannery is crucial to the Traditional lifestyle but is closed. Funding possibilities for heating and electricity are being explored. Marketing and management alternatives are also being looked into so it can be successfully maintained when reopened.

Community and family ties are strong; locals help each other and teach and learn from one another. Traditionally made tools and clothes-making skills are passed on from generation to generation.

Pull-tab and Bingo games raise funds in support of Search & Rescue, the Clinic, and emergencies.

**Employment Opportunities:**
- IRA/City/Corporation – Offices, Bingo, Seasonal
- Shishmaref Dog Mushers Association
- BSSD School – Substitute Teaching, etc.
- Stores and Snack Shack
- Kawerak – Tribal Coordinator, ICWA, VBC
- Clinic
- UAF/NWC – Learning Center
- ABE
- VPSO

Freshly caught seals stay frozen outside the home in winter.
All ACS statistics are published with their respective margin of error (MOE). Some of the statistics here are calculated from the original ACS data. The MOE was unable to be carried through the calculations.

The following Income and Employment data is from the U.S. Census Bureau's 2006-2010 American Community Survey 5-Year Estimates. Additional detail is available through the Alaska Department of Labor and Workforce Development pages.

**Employment:**

<table>
<thead>

</tr>
</tbody>
</table>

| Not in Labor Force                 | 173      | 43.47%  |

**Employed Workers:**

| Private Wage & Salary Workers:     | 75       | 51.37%  |
| Government Workers (City, Borough, State, Federal): | 65 | 44.52%  |
| Self-Employed Workers (in own not incorporated business): | 6 | 4.11%  |
| Unpaid Family Workers:             | 0        | 0%      |

**Income:**

- Per Capita Income: $10,439
- Median Household Income: $37,286
- Median Family Income: $34,286

**Poverty:**

- Persons in Poverty: 208 (31.56%)
## Business Licenses in Shishmaref

The following records reflect current business licenses on file with the Department of Community and Economic Development, Division of Occupational Licensing, Business Licensing Section. These licenses may not represent actual business activity. For more information on a specific business, use Commerce's Business License Search website.

5.0 Environmental Scan

5.1 Soils and Topography
Sarichef Island is composed of beach sand which is subject to erosion by wind and by wind-driven tides and waves. Subsurface drainage is good in the elevated areas and very poor in the organic-covered lowlands. The organic mat ranges from ½ to 3 feet thick, typically thicker in low-lying bogs. Lowlands, usually closed depressions are only 3 to 4 feet above sea level, and are filled with water or ice during most of the year. Sand dunes form local high knolls and are about 15 to 20 feet above sea level.

Sarichef Island is underlain by permafrost, with an active layer ranging from 1 to 5 feet below the surface. Local groundwater perched above the permafrost is found throughout the active layer.

5.2 Vegetation
Local residents harvest a variety berries and greens from the land.

5.3 Climate
The region experiences a transitional climate between the frozen Arctic and the Continental Interior of Alaska. Summers can be foggy with average temperatures ranging from 47 to 54 degrees F. Winter temperatures range from -12 to 2 degrees F. Average annual precipitation is about 8 inches, including 33 inches of snow. The Chukchi Sea is frozen from mid-November through mid-June.

5.4 Wildlife
There are too many individual wildlife species around Shishmaref to list. Residents use seal, fish, walrus, polar bear, rabbit, moose, caribou, reindeer, and crab for food and materials to make tools, clothing, and other crafts. Those are just a few examples.

5.5 Historic Preservation
Shismaref has archaeological and cultural sites mapped just west of the village near the fresh water source. As a result of the Repatriation Act, human remains and funerary objects in the collections of the National Museum of Natural History, Smithsonian Institution, will be returned to Shishmaref.

5.6 Seismic, Flood, and Wetland Information
Erosion and flooding are very serious problems in Shishmaref. The Army Corps of Engineers rates the flood potential for most of the island as high with wind-driven waves creating the greatest hazard. Most of the village has been flooded and many buildings damaged in storms. Protective structures have been constructed to help slow erosion with limited success.

The erosion problem is caused by storm-driven waves beating against the sandy island shore. Sarichef Island’s stability is believed to be the function of its underlying permafrost which is melting. Changes in the depth of frost, when coupled with onshore storms can result in rapid localized erosion.
Alaska's wetlands occupy 43.3% of its 403,247,700 acres. This contrasts to the contiguous US where they occupy only 5.2% of the land surface. Wetlands in Alaska include: bogs, fens, wet and moist tundra, ponds, forests, mud flats, fresh and salt marshes. Most regions in Alaska have a land surface with extensive areas of wetlands. Expanses of moist and wet tundra underlain by permafrost occur in the northern and western regions. Some of the Nation's most extensive complexes of salt marshes and mud flats occur along the coasts of the Bering Sea.

5.7 Land Status

**Alaska Native Claims Settlement Act (ANCSA)**

**Land Status**

<table>
<thead>
<tr>
<th>ANCSA Land Entitlement:</th>
<th>Shishmaref Native Corporation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Village Corporation:</td>
<td>Shishmaref Native Corporation</td>
</tr>
<tr>
<td>12(a) Land Entitlement in acres, (see Note 1):</td>
<td>115,200.00</td>
</tr>
<tr>
<td>12(b) Land Entitlement in acres (see Note 2):</td>
<td>9080.00</td>
</tr>
<tr>
<td>14(c)(3) Status (see Note 3):</td>
<td>In Process</td>
</tr>
<tr>
<td>14(c)(3) Agreement Signed:</td>
<td>No</td>
</tr>
<tr>
<td>Map of Boundaries done:</td>
<td>Yes</td>
</tr>
<tr>
<td>Municipal Land Trust:</td>
<td>No</td>
</tr>
<tr>
<td>Appropriate Village Entity (see Note 4):</td>
<td>n/a</td>
</tr>
</tbody>
</table>

**Notes:**
1. ANCSA 12(a) land entitlement to village corporation from federal government.
2. ANCSA 12(b) land reallocated to village corporation from Regional Native Corporation.
3. Under ANCSA 14(c)(3), village corporations must reconvey certain land to the local city government or the state in trust to provide for community use and expansion.
4. Recognized village group which represents the views of residents on municipal trust land acquisition and management in accordance with AS 44.33.755(b) and 3 AAC 190.110 - 150.

5.8 Designated Land Status and Management Issues

The landfill could be considered an area of contamination because it is over-filled. But Shishmaref is essentially a pristine environment.

5.9 Land Use Potential

There is limited land available for new construction within Shishmaref. Land issues are dealt with on a case by case basis. The City, IRA, and Corporation work through issues together for the greater good of the community.
6.0 Strengths, Weaknesses, Opportunities, and Threats (SWOT)

**Strengths:**
- School
- Elder’s knowledge
- Keeping traditions
- Traditional subsistence areas
- Children
- Elder’s teaching survival skills
- Subsistence lifestyle
- Shishmaref Erosion Coalition Committee
- Organizations working together for the community

**Weaknesses**
- Not enough elder/youth involvement
- Lack of equipment to pick up trash
- Poor roads-too low and not enough of them
- Substance abuse
- Lack of snow-clearing equipment for new housing area
- Inadequate delivery of services to new housing area
- Houses are too close together
- Finding a “new Shishmaref”
- Water and Sewer
- Dealing with erosion problem
- Poor Washeteria
- Water tank too small
- Current water source inadequate
- We need more after school/summer activities for children and adults
- Need Inupiaq tradition and language classes
- The word “relocation”
- Need ways to entice youth to live and work in Shishmaref after getting certifications and degrees

**Opportunities**
- Outlet for expert carvers and skin sewers
- Local college
- Local training for high paying jobs (heavy equipment etc)
- Driver’s education
- Relocation is a chance to start over and keep people together

**Threats**
- Erosion
- Lack of local resources
- Dependency on outside funding sources
- Lack of job opportunities for skilled people for local jobs
- Lack of Training
- Lack of water and sewer
- Because of the word “relocation,” Shishmaref can’t get as much funding as it should
7.0 Shishmaref’s Vision, Goals, and Values

7.1 Shishmaref’s Vision Statement

To empower our people to embrace our current and future community development; to improve & strengthen the lifestyle of our people while protecting the cultural & traditional Inupiaq values of our community.

7.2 Shishmaref’s Development Goals and Objectives

Goal #1 - Health and Culture
Integrate local culture and traditions with modern technologies in order to have a balanced, healthy lifestyle.

Objectives

1. Fulfill the younger generations hunger for traditional activities and assure a youth camp is established.
2. Work to accomplish that a culture center is built.
3. Achieve a higher rate of immunizations, lower rate of cavities, diabetes, heart disease, and cancer.
4. Assure that at least 2 people are CPR/FA certified.
5. Assure that water and sewer is in every house.

Needs

Health
1. Preventive screenings
2. Local emergency services
3. Clinic van
4. Water and sewer
5. Clinic improvements
6. PA housing
7. Healthy lifestyles

Culture
1. Traditional activities – boat building, sled making, sewing hat/hats, mukluks, parkas, carving, drumming, life skills/retrieve sea mammals
2. Artifact reclamation

8. Health aide – CPR/First aid
9. Recycling, landfill, trash haul
10. Pure water source and delivery
11. Dust control
12. Removal of asphalt, organic materials, and hazardous objects
13. Energy-efficient homes

3. Inupiaq language
4. Museum/cultural center
5. Native arts and crafts retention
6. Arts and crafts gallery
7. Natural foods processing
Goal #2 - Social Services and Infrastructure
To provide and sustain adequate public and social services

Objectives

1. Assure that basic public facilities are in place and utilized.
2. Work to achieve a decrease in social ills and crime rates.
3. Healthy families—lower the abuse and neglect rate, higher educational attainment, assure the younger generation is stepping into leadership roles guided by the elders.
4. Form a culturally sensitive Tribal court.
5. Decide future of Shishmaref, whether it be relocating or staying in place.

Needs

Social and Public Services
1. Recreation—year round center and outdoor recreation
2. Fire hall—local services and training
3. Day care—building and certification
4. Parenting skills support groups
5. Counseling for all ages
6. Community kitchen—potlucks
7. Local substance abuse program
8. Local Tribal court
9. Food bank—salvation army
10. Local police force—training
11. Gambling anonymous
12. Leadership—keep island intact

Public Infrastructure
1. Energy source
2. Improved airport terminal
3. Improved washeteria
4. Road improvements
5. Government and public buildings
6. Adequate housing/lots
7. Heavy equipment
8. Bulk fuel consolidation
9. Improved internet
10. Land use management
11. Energy-efficient homes

Goal #3 - Job Training, Education, Business, and Economic Development
Develop a trained local workforce to sustain the local economic base.

Objectives

1. Lower the unemployment rate.
2. Higher number of trained and certified residents.
3. Decrease in public assistance
4. Increase in small businesses.
5. Independent local organizations
6. Increase in local doctors, teachers, pilots, accountants, lawyers, and other professionals.
Needs

Job Training and Education
1. Training centers
2. Scholarships
3. Vocational training
4. 0-3 Literacy program
5. Airplane mechanics/pilots training
6. Computer technology training
7. Heavy equipment operation training
8. Exchange programs
9. Grant writing training

Business and Economic Development
1. Marketing
2. Accounting/CPA
3. Guiding/nature tours
4. Small business development
5. Beauty salon/barber shop
6. Theatre
7. Restaurants
8. Hotels, B&Bs, and apartments
9. AC store, mall
10. Mechanic shop/small engine repair
11. Gas station
12. Bank/ATM
13. Health club/spa
14. Rentals-snow machine, ATVs
15. Taxi service
16. Administrative capacity/management
17. Boat harbor

7.3 Shishmaref Community Values and Development

7.3.1 Shishmaref Values

“What are the values we, as a community, feel are important to our way of life?”

Elders’ knowledge with Inupiaq and traditional values, while living a subsistence way of life with the modern world

The community defined its core values and vision for guiding local development by answering the following four questions:

Question #1: What are your favorite things to do in your community?
Sew; visit people; play basketball; sing with choir; biking; riding around; Eskimodance; go camping; fishing; play games like: manna manna mae, running and chasing, and izrigaagauti; watch basketball; beach combing; gather greens; pick berries; potlucks; learning from family; qapsraq; listening to Elders’ stories; helping each other in time of need and when noticed; eat Native foods consistently, anytime, and frequently; prepare Native foods; dog mushing; parky and mukluk making; carving; subsistence-spring preparation; clamming; recreational events; baseball; Eskimo football; church; snowgo; Hondas; boat; Argo; trucks; net/ice; net under ice; hunting ducks, caribou, moose, musk ox, bears, oogrook, walrus, and seals; egg gathering; artifact digging; babysitting; take long walks; doing things as a community; help Elders; take kids on picnics; watch TV; going on the internet; listen to radio; get ice.
Question #2: Where are your favorite places to go?
Serpentine Hot Springs; crabbing; hunting; ocean; river; mainland; island; birthday parties; go to the washeteria to visit other people; church inspiration; sliding; picking berries; picnics; basketball tournaments; boating; church conferences; dog races; school; accessibility to all seasonal camping areas; up and down the coast; exploring old sites with old sod houses; community hall; the Friendship Center; spring carnival; going out in the country; Bingo; pull-tabs; tickets; family; ball games; gym walking on the beach; subsistence racks; camping at the racks; channels and do fishing; computer labs; stores; library; recreation and gym; parsonage; seal hunting; clamming at channels; visit relatives or friends.

Question #3: What are your favorite reasons you live in Shishmaref?
Everything is not so spread out; easy to get around; short walk or drive to the store; bird hunting; family; multiple generations nearby; being born and raised here; it is a dry village; we know everyone; kids are safe to play out; comfortable church; close knit community; preschool available for everyone; free medical care; kids can visit; play with no appointments; friendly; generous; good drinking water and ice; no discrimination; It’s home – people move away and still come home to visit or call; still call it home even if you live elsewhere; relation to surrounding villages like Wales, Teller, Brevig, and Nome; we do NOT live in Nome… we like it here; good location for subsistence; access to ocean and lagoon; peoples’ friendliness; beach; ocean view; holiday activities; Christmas activities; Eskimo games; birthday parties; access to ocean and mainland; people are friendly; lagoon for hunting and fishing; participation in community activities; people help each other; close to hot springs; Elders.

Questions #4: What is really important that makes Shishmaref your home?
Friends; hospitality; friendliness; church; fish; walrus; salmon; berries; sura; geese; ducks; water; strong families; good place to hunt for food; Elders’ knowledge and willingness to teach traditions; children; school – good education; motivated teachers who care; youth who get higher education; stores; fee safe – except for erosion threats; work – not only at jobs but working at subsistence; traditional Eskimo foods; revival of Eskimo dancing; we excel in Native arts; crafts; seal oil; leadership; importation laws; alcohol and drugs are controlled; family trees; relation; roots; spirituality; Lutheran regional conference; “shiverce;” keeping together; practicing Native values like sharing; preparing Native foods; helping each other; attending birthday parties; carving; having Elders around for advice; daily air service; traditional social activities during holidays; having health clinic; all animals close by Shishmaref; always have work to do; people care for each other in time of need.
7.3.2 Applying Values to Community Development

When we develop and plan important projects or programs, what are the things we must remember? We should:

- Finish education – at least high school – in order to get training & certification/licensing
- Return to live & work in Shishmaref after completing college or training outside Shishmaref
- Protect our subsistence resources & customary & traditional heritage so our children can continue our lifestyle.
- Plan so we benefit as many members of community as possible.
- Finish the projects we start.
- Encourage as much local hire as possible.

8.0 Project Brainstorm

Focus Question: What are future community projects and activities that we can develop that will enhance our community, which best build on our identified cultural strengths, community development opportunities and current community assets over the next five years?

Health Services
- Suicide Prevention Program
- Health Prevention and Education
- Day Care Center
- Hospice/Shelter
- Stop Drugs.
- Bullying
- Traditional Healing Center
- More Exercising Activities in the whole community
- Quyanna Senior Center

Local Economic Development
- Recreational Vehicle Rentals
- City/Tribal Coffee Shop
- Shishmaref Commercial Fishing – own CDQ
- Another Retail Outlet
- Privatize the Tannery.
- Snow Machine – Sled Shop
- Regional Hotels and Restaurants
- Arts and Crafts Center or Business Website
- Income from clothing with local logos – sweats, mugs, bags, tees
- More Artwork for Youth
- Self-sustaining Tannery
Cultural Awareness
- Help the Elders more often.
- Do chores for our Elders (dump trash).
- Tours to Hotsprings and subsistence camps
- Potlucks
- Cultural Camp
- Native Food Night
- Culture Night
- Cultural Activities
- Traditional food restaurant
- Senior lunch program involving youth
- Inupiaq Games
- Inupiaq classes with Youth and Young Adults

Housing
- Apartment or Office Rental
- Land expansion for more housing
- Housing Problems
- Traditional Tool Making Center
- Leadership Training for Leaders and Youth
- Bullying
- Career Exploration Classes
- Regional Educational Hostels in Nome, ANC, and FBKS for Students
- Inupiaq Classes with Youth and Young Adults

Education
- Learn to speak our Inupiaq Language
- Learning Center (Youth can learn how to keep the tradition going.)
- Survival Skills
- Housing Eligibility
- Learn how to dance Inupiaq.
- Listen to Elders tell stories.
- Story-telling from Elders
- STOP DRUG
- Carving Classes
- Traditional Tool Making Center
- Leadership Training for Leaders and Youth
- Bullying
- Career Exploration Classes
- Regional Educational Hostels in Nome, ANC, and FBKS for Students
- Inupiaq Classes with Youth and Young Adults

Social
- Movie Nights
- Let youth spend more time with Elders
- Mentorship Program for High School kids in the offices
- Basketball Camp during the summer
- Radio Station
- Bullying
- Gambling Anonymous (Parents’ time with students)

Transportation
- Bus/Taxi
- Airport terminal w/Hotel & Restaurant
- More roads to access Lagoon boat launches
- New Road South Side of Community
- Dust Control
- Terminal Near Airport

Public Safety
- STOP DRUGS
- Tribal police officer
- Magistrate
Community Infrastructure Development
- Erosion Control
- Community New Site Planning
- Teen Center
- New Heavy Equipment
- Own Community Search & Rescue
- Arcade Center & Snack Shop
- New Fire Equipment for Volunteers

Sanitation
- Better Sewer and Water Haul (Keep a healthy lifestyle.)
- Separate sewage and water haul systems and personnel
- Piped water and sewer
- Additional water storage tank
- Community Bulk clean up
- New Dump Site
- Larger water reservoir

9.0 Development Priorities and Implementation
There were nine priorities identified in the Project Brainstorm by the Shishmaref Planning Committee and approved by the City of Shishmaref, the Shishmaref Native Corporation, and the Native Village of Shishmaref in order to improve the economic development for the community. In order to provide a thorough understanding of each project, the following information is given for each priority:

Project Description
- Background
- Project Needs and Benefits
- Potential Constraints to Project Development

Project Implementation
- Plan of Action
- Organizations Responsible and Contact Information
- Funding Possibilities
**Jointly Approved Top Priorities for the Community of Shishmaref 2013 – 2018**

The Shishmaref planning participants chose not to rank their Top Priority Projects. They see their Priorities as being interdependent without one being more important than another. Participants agreed that a circular chart of their Priorities is in line with their cultural perspective. This chart represents what is required for Shishmaref’s well-being as a whole, consisting of interrelated parts.
9.1 PRIORITY: *Multi-Purpose Building*

9.1.1 **Project Description**

*Background*
Shishmaref provides many services for its residents, but activities are spread around the community instead of centrally located together for ease of access. Facilities are not available for the public to participate in certain activities that are important to the community as a whole. Key activities and facilities needed for social well-being, traditional & modern survival skill development, and local administration have been identified by the community.

*Project Needs and Benefits*
Shishmaref is planning a centrally-located facility that provides these benefits:

- Public kitchen (none currently)
  - for Elders Lunches
  - and baking classes
- Lunch room for Elders
- Elders & Youth Facility
  - Reduce drug-use issues by providing healthy activities & interaction. Youth are turning to drugs because there are not enough constructive activities available that interest them.
  - There is no place to teach essential skills like tool & seal net making/repair, etc.
- Traditional Skills Learning Center/Workshop
  - Carving & sewing workshop would help economic development because artists make money for food and other needs by selling their crafts.
- Local Traditional Art Showcase like a museum
- Meeting/Conference Room
  - IRA does not have adequate conference room for meetings.
  - Facility could include IRA office.
- Debriefing Room for Emergencies/Deaths
  - Family environment for making obituaries, etc.
- Public Computer
  - Internet
  - Printer
  - etc.
- Guest Lodging
Potential Constraints to Project Development

- There may be land issues. A central location in the village will have to be negotiated.
- There may be Federal and State restrictions about housing office space for the IRA.
- Revenue streams will have to be developed to pay for ongoing costs of operating the facility.
- Initial construction and startup costs

9.1.2 Project Implementation

Plan of Action

- Negotiate land use for construction. There is a potential site directly south of the church. It has been discussed with the pastor. He is willing to consider it. The Corporation might be involved in assigning land for the project.
- Determine construction costs and funding sources. It would be beneficial for the IRA to apply for funding since most things that will be housed in the new facility are related to Tribal Government. The City may provide matching funds & grant applications. The Church may be involved in project development as well since it is part of the Wellness Coalition.
- Build and insulate for energy efficiency (lighting, heat, etc.) with alternative energy in design (solar, wind, etc.)

Organizations Responsible and Contact Information

1. Native Village of Shishmaref
   PO Box 72110
   Shishmaref, AK 99772
   Phone: 907-649-3821
   Fax: 907-649-2104

2. City of Shishmaref
   P.O. Box 83
   Shishmaref, AK 99772
   907-649-3781 ph
   907-649-2131 fax

3. Shishmaref Native Corporation
   PO Box 72151
   Shishmaref, AK 99772
   Phone: 907-649-3821 or 2082
   Fax: 907-649-2104
   Email: tc.shh@kawerak.org
Funding Possibilities and Other Contact Information
Kawerak’s Community Planning and Development program has a Regional Grant Specialist that might be able to assist in identifying possible sources of funding. Contact at regspec@kawerak.org or 443-4254.

- CDBG – City applies
- Denali Commission
- ICDBG – IRA applies
- Rasmussen Foundation
- State and Federal Funding Requests are possible. Contact Legislators.

- Ongoing revenue for overhead costs may be developed through:
  - Rent from Bingo, IGAP,
  - Kawerak Tribal Coordinator
  - Guest Lodging
  - City/Tribal Coffee Shop
  - Craft Sales
  - IRA clothing with logos (sweats, bags, hats, tees, mugs, etc.)
  - Suicide Prevention Grant would pay for salary & activities. IRA used it for activities at the Friendship Center in the past.
9.2 PRIORITY: Cultural Center & Activities

9.2.1 Project description

Background

- Shishmaref does not have a Qasgi or other places devoted to transferring traditional skills and knowledge from one generation to the next. The community has a plan to fill this gap by building a Cultural Center & having activities that blend local traditions with modern technology. To prepare and equip new generations to live healthy lives that balance both worlds is the purpose of the project.

- Traditionally, the Native culture of Shishmaref had Qasgis and other spaces where youth were taught by their elders. In order to maintain their independence, well-being, and survive, traditional skills & knowledge have to be successfully taught to each new generation.

- Shishmaref School has a very limited curriculum for teaching the traditional skills needed to survive and thrive physically and spiritually in the local environment. The new generation of Shishmaref Natives has not learned its Inupiaq language and is in the process of learning to hunt, harvest, prepare & preserve food, make tools/clothing/medicine/and other crafts.

- Things like hunting, harvesting, food preparation & preservation, and clothes-making must be passed on to the youth. The community must develop a center for meeting this need. Otherwise, future generations will depend too much on the outside world for their basic needs.

Project Needs and Benefits

- A place to teach traditional skills, activities, & knowledge
  - Someone will teach:
    - Tool & clothing making
    - Food preparation & preservation
    - Inupiaq language
  - The lifestyle and survival are at stake:
    - If new generations don’t learn history, survival skills, and traditional food/tools/clothes-making, they will be dependent.
    - If they learn from hands-on experience and teaching, they will be independent.

- Gift shop/displays/kiosk
  - Sales – crafts, etc.
  - Computer/video demonstrations of traditional tool use & other methods

- Preserve traditional Shishmaref Inupiaq Culture through community activities - Values, lifestyle, skills, and knowledge.
  - Carving
  - Skin-stretching & Sewing
  - Sled & boat building
  - Potlucks
**Potential Constraints to Project Development**

Identifying the necessary funds to establish the Cultural Center will be a major challenge. The Berengia Museum planned in Nome is hard to fund. This project will take creativity and thinking outside the box.

### 9.2.2 Project Implementation

**Plan of Action**

- Discuss creative strategies with others who have experience with similar project development.
  - Kawerak’s Berengia Museum Project Director, Amy Russell may have some insights about what could work in villages. It might be possible to tie the Cultural Center into the Berengia Museum Project although some people do not want to cross cultures.
  - Barrow started their $12 million dollar Cultural Center in the 1990s and may be able to share from their experience.

- Write business plan.
  - Kawerak’s Business Planning Specialist, Alice Bioff, can assist with this step.

**Organizations Responsible and Contact Information**

1. **Native Village of Shishmaref**
   - PO Box 72110
   - Shishmaref, AK 99772
   - Phone: 907-649-3821
   - Fax: 907-649-2104

2. **Shishmaref Native Corporation**
   - PO Box 72151
   - Shishmaref, AK 99772
   - Phone: 907-649-3821 or 2082
   - Fax: 907-649-2104
   - Email: tc.shh@kawerak.org

**Funding Possibilities and Other Contact Information**

Kawerak’s Community Planning and Development program has a Regional Grant Specialist that might be able to assist in identifying possible sources of funding. Contact at regspec@kawerak.org or 443-4254.

- Private and public sector funding sources might be joined.

- Potential revenue sources for covering overhead costs at the Cultural Center:
  - Online art sales
  - Retail/wholesale/tourist sales
  - Shows
  - Website
9.3 PRIORITY: Youth

9.3.1 Project Description

Background
Shishmaref plans to establish and maintain anything and everything it can to benefit its youth so they can be happy, optimally prepared for healthy & productive lives as adult, and avoid pitfalls like depression & dependency.

Project Needs and Benefits
- Facilities and things to do like after-school activities give youth a variety of healthy choices that help them grow as community members & leaders and avoid pitfalls like low self-esteem, despair, drugs, and alcohol.
  - Mentorship opportunities that build skills of all kinds both traditional and modern
  - Educational opportunities for changing times
  - Jobs-development to provide income and career-exploration
  - Sewing, carving, and other craft classes
  - Travel for national Youth Leader conferences
  - Inupiaq Language teachers and classes
  - Involvement in community planning
  - Big Brothers/Big Sisters program
- Encourage and incentivize youth to come back to Shishmaref after college to live and lead as members of the community

Potential Constraints to Project Development
Some youth are ineligible for certain activities. Reasons include being underprivileged financially and academic performance & attendance not meeting public school requirements.

Some youth programs already exist and can be continued. Others need to be established. One benefit Shishmaref does not have that other Bering Strait communities receive is inclusion in NSEDC’s generous programs. For example, NSEDC provided every other Bering Strait community with $100,000 for youth programs in 2012.

9.3.2 Project Implementation

Plan of Action
- Maintain and expand existing and future youth programs
- Survey community members, especially youth, to determine what programs, activities, and opportunities they are most interested in maintaining and establishing.
- Establish new youth programs with as much youth input and involvement as possible so they have a sense of ownership for what is being created.

- NSEDC?
9.4 PRIORITY: Housing, Apartments, Rentals

9.4.1 Project Description

Background
Shishmaref’s housing is currently inadequate for its needs. The Alaska Housing Assessment defines overcrowding as less than 300 square feet per person in a home. Multi-generational extended families living in homes make overcrowding common in Shishmaref. The extent to which families double up is difficult to measure because not all households apply for assistance or renew paperwork. Thus, the problem might not appear as dire to regional and state agencies as it appears at the local, village level. Convictions or inadequate work also serve as barriers to assistance and housing construction.

Another result of the housing shortage is that professionals like Physician’s Assistants do not have permanent residence in Shishmaref.

BSRHA does an annual study of housing needs. Shishmaref needs 100 new homes. The Native Corporation has parcels set aside for new development as per 14 (c)1. The IRA agreed to use the Title VI loan program for new homes, but construction has yet to begin. Twenty new units were planned. That number has been reduced to seven. The community has been waiting for years for the construction process to begin.

Most homes in Shishmaref have structural problems that need repair. Mold affects older and new homes. Many have issues with flooring, electrical wiring, and water & sewer. Some floors sag causing drafts. Homes do not have fire escapes. Homes built too close together pose a threat of fire spreading from one to another. 1/3 or fewer homes have some combination of running water including toilet, sink, and shower, but most use honey-buckets.

Opportunities for weatherizing homes are limited. Some residents make too much income to qualify for weatherization grants. But they do not have enough income to afford weatherization on their own.

BSRHA guarantees repairs during the first year under contract. But home-owners are responsible for costs beyond that. BSRHA has installed more efficient heating systems in 41 homes in Shishmaref.

Some residents express concern to have better understanding of regulations required for finance and other options.
Project Needs and Benefits

- Tear down condemned homes to reduce threat of fire spreading to other units.
- Weatherize existing homes to increase energy efficiency.
- Renovate existing homes for safety regarding issues including mold and fire danger.
- Design new homes to be as energy-efficient as possible.
- Integrate as much alternative energy technology into new homes as possible.
- Build new homes, apartments, and lodging to alleviate overcrowding and provide shelter for visiting & permanent medical practitioners & other professionals & guests.
- Possibly start a Shishmaref Housing Authority so Shishmaref can administer its own NAHASDA funds which might speed up the new home construction process and provide more local employment.
- Possibly start a home-owners association to assist Shishmaref residents utilize and increase understanding of regulations required for finance and other options.

Potential Constraints to Project Development

BSRHA and Rural CAP build and weatherize homes in rotation among the villages and have limited funding resources to work with. Shishmaref IRA gets money from HUD for housing projects. Money is pooled with other villages for mutual benefit. But the waiting list for projects can take as long as ten years to go through a rotation. Shishmaref is exploring and applying for alternative funding possibilities.

Funding for housing projects is decreasing while construction costs are rising. Material costs in the Bering Straits Region have increased an average of 10-15% every year over the last decade. Ten years ago residential construction cost about $375 per square foot. Now the cost is $500-$550 per square foot and sometimes as high as $600 per square foot.

Potential costs include: materials, shipping, liabilities, insurance, labor, management, plumbing, water, sewer, codes, roads, permitting, fuel, electricity, training, land-lot, turn-over, time-line, administrative, soil tests (up to $5,000 per site for engineer to travel to Village), and surveys.

Limited employment in villages contributes to the challenge of making home improvements or new construction.

The building season is short due to extreme subarctic weather conditions. When it gets too cold to do construction work outdoors, most progress is limited to what can be done indoors.
Acquiring housing is challenging for middle-income people. They make too much money to qualify for low-cost housing programs. But they do not make enough money to purchase housing on their own.

Eligibility for BSRHA’s Village Purchase Homebuyer Program is also dependent on credit and criminal background checks. People with a history of being evicted or convicted have a hard time finding housing which adds to the pressure of the situation. People with certain convictions can be disqualified for life or for years depending on the offense. These regulations are in accordance with the Federal Housing Act and enforced by HUD. In some cases, people who seek and complete rehabilitation through Behavioral Health Services can be granted special consideration. But it does not guarantee that the Housing Authority can relax its regulations.

9.4.2 Project Implementation

Plan of Action

- Create a village planning committee consisting of five to seven key people from major entities in the Village (IRA, Corporation, City, School, Clinic, Utilities, etc.). Meet quarterly to discuss housing issues. The committee can arrange to have a representative from the Bering Straits Regional Housing Authority (BSRHA) present at each meeting to address the plan of action step-by-step as it develops.
- Conduct a local survey to determine the housing needs and number of units needed.
- Look into proven and affordable alternative methods and designs for construction and renovation.
- Incorporate traditional local input into planning and designing.
- Clearly define administrative duties.
- Develop a local skilled overseer/project manager.
- Contact BSRHA to arrange Housing Authority representation at village planning committee meetings.
- Outsource duties to outside administrator, if necessary, while developing a local skilled overseer/manager.
- Hold joint meetings with the city, corporation, utilities, etc. to plan where to build.
- Select potential sites for the new homes and look into easement and environmental issues as well as access issues to utilities.
- Test soil to make sure it is not too soft.
- File paperwork with the City for making the new lots.
- Write management and maintenance policies for the potential rental units. Develop application forms and lease agreement forms.
- A grant-writer will establish & cultivate relationships with existing and potential project partners and secure funding & other forms of project assistance.
• Submit grant applications.
  o Kawerak’s Regional Grant Specialist, (907-443-4254) may be able to assist in identifying possible funding sources.
• The Tribe can apply for the ICDBG grant or they can look into the leveraging options listed below:
  o Title VI options – The Tribe may borrow against future block grant allocations.
  o Partnering – There are USDA programs for low interest loans to build houses for eligible families.
  o Section 184 – There is a program where the Tribe can use a commercial bank to obtain funds for new housing.
• Get locals trained and certified for construction work. Provide as much on-the-job (OJT) training as possible for residents, including youth.
• Clear & ready lots, build foundations, and get gravel.
• Continue to work with the Tribe, City, Corporation, and private owners to expand all housing opportunities in the community. Include in agenda for tri-council meetings.
• Continue to seek funding to assist community members in renovations.

- Grant deadlines: Approximately January 15, April 15, and November 15, annually
- Grant amounts: Usually under $5,000
- Primary contact: Ms. Kimberly Lynch, (206)-256-2659
  http://www.americanseafoods.com/
9.5 PRIORITY: Economic Development

9.5.1 Project Description

Background
Shishmaref does not have all the services or employment opportunities its residents need for the standard of living they want. It is planning to develop multiple products & services that capitalize on the local skill-base, natural resources available, modern & traditional technology, and public & private sector funding opportunities. Project components in discussion:

- Gift Shop
- Tannery
- E-Commerce
- Tourism
- Eco-Tourism
- Hotel

- Coffee Shop
- CDQ
- Local Maintenance Shop
- Restaurant

Project Needs and Benefits
- Gift Shop, possibly at Tannery – display and sell local arts & crafts; increase local income; attract tourists; help pay for overhead of outlet
- E-commerce – reach global market with locally made products; possibly attract tourists to visit
- Capitalize on traditional skills – generate income for artists through sales and employment.
- Market local assets for tourism.
  - Hot springs
  - Camps
  - Eco-tourism
- A hotel would provide guests with lodging while increasing revenue and employment in the community.
- Provide dividends to share-holders.
- Developing a CDQ program would combine the strengths of and benefit multiple Chukchi communities.
- A local maintenance shop would provide employment and make it much easier to repair & maintain vehicles & equipment. Without the necessary facilities, tools, or mechanical expertise, broken equipment often goes to the landfill and gets replaced which is costly and not environmentally-friendly.
- A restaurant would provide employment for locals. There would be a place in Shishmaref for residents and visitors to sit at a table to enjoy a hot meal.
Potential Constraints to Project Development
Any economic development projects in Shishmaref may require the creativity and teamwork of all three governing entities. New infrastructure, equipment, and expertise will be required. Establishing some things, like a CDQ, will require support at the legislative and congressional levels. Patience, perseverance, and unified community vision will be required to achieve Shishmaref’s goals and objectives.

9.5.2 Project Implementation

Plan of Action
- Governing entities may form partnership to match and manage development.
- Look for successful examples of similar projects for ideas and discuss strategies with people who developed and manage them.
- Possibly tie local tourism industry into the Cultural Center.
- Develop infrastructure.
- Get equipment.
- Address CDQ issues and the possible formation of a new CDQ for Chukchi communities at Congressional level of government.

9.6 PRIORITY: Community & Regional Technical Training Center

9.6.1 Project Description

Background
Adult continuing education service in Shishmaref is limited to UAF Distance courses accessible through the Learning Center. Instruction and certification in skills like wood/metal-working, mechanics, welding, RN, coders, piloting, etc. are available for youth who travel to NACTEC for school. But adults in Shishmaref do not have access themselves. They can travel out of region for educational opportunities but leaving family in Shishmaref can be highly undesirable or impossible.

Project Needs and Benefits
Improve the economy of Shishmaref by increasing the educational opportunities for adults in fields like:

- Metal
- Wood
- Mechanics
- Welding
- RN
- Coders
- Piloting
- Etc.

Training and certification in all kinds of professions will qualify the local workforce for jobs that are being taken by outsiders. Having more qualified technicians and mechanics would improve the maintenance and performance of Shishmaref’s heavy equipment and make it easier for locals to have their vehicles repaired.

Additional training and qualifications will further empower the Tribe’s self-determined future. Youth may be more encouraged to pursue college careers whenever they see the adults they respect choosing to go back to school.

Local training opportunities will give people more options for improving their lives without having to leave their families in Shishmaref.

Potential Constraints to Project Development

- Infrastructure
- Program development
- Salary for faculty
- Tuition/Boarding
9.6.2 Project Implementation

Plan of Action
- Shishmaref’s governing entities will provide residents with financial aid and information about other funding opportunities for school.
- Youth will be encouraged to continue their education and live and work in Shishmaref.
- Partner with the UAF Learning Center in Shishmaref and explore possibilities for how to expand educational opportunities for locals.

• Horning Memorial Scholarship
9.7 PRIORITY: Alternative Energy

9.7.1 Project Description

Background
As the population grows and new structures are built, the demand for power increases. The diesel generators are costly to keep running as the fuel costs continue to rise. The Emerging Energy Technology Grant Fund (EETGF) might install an experimental floating turbine in Shishmaref to supplement the electricity generated by the power plant.

Project Needs and Benefits
Reliable power is necessary to daily life and will improve the well-being and safety of residents. Exploring alternative sources of energy will help prepare Shishmaref to more efficiently and economically serve its residents. Residents will still pay for their electricity but the cost of renewable power sources will not rise with the price of fuel. Alternative energy sources do not require bulk storage or depend on timely and costly delivery by barge.

Renewable energy resources sources that Shishmaref has the potential to use can provide power during all seasons and include:

- Solar
- Wind
- Ocean Current

Many homes and businesses in Shishmaref need renovations to make them more energy efficient no matter what power source is used.

Potential Constraints to Project Development
Funding and land issues are the major constraints to the project. High shipping costs and a short construction season are also issues.

9.7.2 Project Implementation

Plan of Action
- Hold public meetings to determine issues and needs.
- Discuss alternative energy project strategies with other Bering Strait communities.
- Maintain contact with Kawerak regarding local and regional energy planning, technical assistance reviewing grant applications, and opportunities.
- Contact various funding agencies for program and funding updates and information regarding:
  - Alternative energy opportunities
  - Home weatherization
  - Energy education
  - Building audits
  - Heat recovery systems

9.8 PRIORITY: Human and Health Services

9.8.1 Project Description

Background
Shishmaref has identified the problems including bullying, the inadequacy of its clinic facility, and not having a meal program for its Elders as needs that must be addressed for the community’s well-being. Others include:

- Suicide Prevention Program
- Health Prevention and Education
- Day Care Center
- Hospice/Shelter
- Stop Drugs.
- Traditional Healing Center
- More Exercising Activities in the whole community
- Quyanna Senior Center

Shishmaref is isolated from Norton Sound Health Corporation (NSHC), the region’s main health care provider. When weather is bad, patients cannot get out of Shishmaref for emergency help and help cannot be flown in. Prescriptions have to be shipped from Nome.

Shishmaref’s Katherine Miksruaq Olanna Health Clinic is old and small. The size of the clinic creates a challenge for health care providers to abide by the requirements for privacy established in the 2003 Health Insurance Portability and Accountability Act (HIPAA), especially when multiple patients are waiting to be seen. Patients are transported on sleds and carts, exposed to the elements, pulled by residents’ personal snow-machines and four-wheelers.

The clinic is a qualified Emergency Care Center. Critical health issues include substance abuse and suicide. Major recurring health problems in the community include diabetes, heart disease, cancer, and alcoholism.

The Clinic is busy and crowded. A 20’ extension is due in the summer of 2013. A morgue will be part of the upgrade. Two new rooms were supposed to be added on but the costs increased by 25% per year from the time the plans were made. An entirely new clinic was supposed to replace the existing one but would have taken 10-12 years to accomplish. Expanding the existing clinic was chosen instead.

Housing for visiting practitioners is also needed. They stay at the clinic in spite of the need for more room.
**Project Needs and Benefits**

- Expand or replace the existing clinic.
  - Provide lodging for visiting health practitioners.
  - Better address patients’ needs on site.
- Reduce bullying in Shishmaref.
- Provide meals for Elders.
- Covered/protected patient transport vehicle

**Potential Constraints to Project Development**

- Short building season
- Facilities are needed to prepare meals for Elders.
- Decreases in funding can delay progress
- Finding ways to reduce problems like bullying takes more than money. Creative approaches have to be explored and the whole community has to collaborate.

**9.8.2 Project Implementation**

**Plan of Action**

- Discuss project with residents at public meetings to generate creative possibilities for addressing bullying problem and how to administer Elder meals until Multi-purpose building is completed.
- Identity possible funding sources and partners.
- Use Kawerak’s grant writer assistance program to hire a grant writer to contact funding sources, seek matching funds from the community, and apply for funds for the various stages of the project.
- Complete clinic expansion.

**Organizations Responsible and Contact Information**

1. **Native Village of Shishmaref**
   - PO Box 72110
   - Shishmaref, AK 99772
   - Phone: 907-649-3821
   - Fax: 907-649-2104

2. **City of Shishmaref**
   - P.O. Box 83
   - Shishmaref, AK 99772
   - 907-649-3781 ph
   - 907-649-2131 fax
3. **Shishmaref Native Corporation**
   PO Box 72151
   Shishmaref, AK 99772
   Phone: 907-649-3821 or 2082
   Fax: 907-649-2104
   Email: tc.shh@kawerak.org

**Funding Possibilities and Other Contact Information**

**Kawerak’s Community Planning and Development (CPD)** program has a Regional Grant Specialist that might be able to assist in identifying possible sources of funding. Contact at regspec@kawerak.org or 443-4254.

**US Department of Health and Human Services**
http://www.hhs.gov/

**Stephen and Mary Birch Foundation**
103 Foulk Road
Suite 200
Wilmington, DE 19803
Phone: 888-372-6303
Primary Contact: Ms. Rose B. Patek, President
Total Annual Giving: $11,493,000
Grant Range: $800 - $5,372,000
Average Grant: $1,000 - $50,000
Eligibility Requirements: Nonprofit organizations
Application Deadlines: None
Areas of Interest: Stephen and Mary Birch Foundation supports nonprofit organizations across the United States. Types of support include general operating and project support.
Application Procedures: Interested applicants should submit a written request that includes a description of the organization and the purpose for which funds are being requested, along with a copy of tax exemption as issued by the IRS.

**Allbritton Foundation**
5615 Kirby Drive
Suite 650
Houston, TX
77005 -2460
Phone: 713-522-4921
Primary Contact: Ms. Virginia L. White, Secretary
Total Annual Giving: $1,500,000
Grant Range: $100 - $50,000
Grant Details: Occasionally larger grants are provided.
Eligibility Requirements: Nonprofit organizations
Application Deadlines: None
Areas of Interest: The Allbritton Foundation provides support to nonprofit organizations that address the following issues:
- civic affairs;
- arts and culture;
- education, including higher education; and,
- health, including hospitals.
General operating and project support are provided.

Application Procedures: Interested applicants should submit a letter that describes the organization, the purpose for which funds are being requested, and the amount of the funding request. Include proof of 501(c)(3) tax-exempt status and financial data for the organization.

MGN Family Foundation
c/o Wells Fargo Bank, N.A., Trustee
MAC D3600-021
16 Broad Street
Charleston, SC
29401
Phone: 888-234-1999
Fax: 877-746-5889
Email: grantadministration@wellsfargo.com
Url: https://www.wellsfargo.com/privatefoundationgrants/mgn
Total Annual Giving: $67,000
Grant Range: $1,000 - $5,000
Eligibility Requirements: Nonprofit organizations
Application Deadlines: February 15, annually

Areas of Interest: The MGN Family Foundation goals are to make grants in fields of education, healthcare, medical research, children's programs, and to help those in the U.S. Military, including their families.

Application Procedures: Application guidelines and forms are available on the website listed above.

The Gertrude E. Skelly Charitable Foundation
4600 North Ocean Boulevard
Suite 206
Boynton Beach, FL
33435
Phone: 561-276-1008
Fax: 561-272-2793
Email: skelly@hhk.com
Primary Contact: Mr. Erik Edward, Esq., FAAN, Co Trustee
Total Annual Giving: $948,000
Grant Range: $2,000 - $50,000
Eligibility Requirements: Nonprofit organizations
Application Deadlines: July 31, annually
Areas of Interest: The mission of the Gertrude E. Skelly Charitable Foundation is to provide educational opportunities, primarily at colleges and universities, and needed medical care for those who cannot afford it. All grants must affect multiple individuals and meet an educational, medical, or emergency need. Support is rarely provided for endowments, or capital projects.

Application Procedures: Application guidelines are available from the Foundation at the address listed above.

American Association of Retired Persons (AARP) Foundation
Office of Grants Administration
601 E Street, NW
Washington, DC
20049
Phone: 888-687-2277
Email: foundationgrants@aarp.org
Url: http://www.aarp.org/foundationgrants
Total Annual Giving: $76,351,000
Eligibility Requirements: Nonprofit organizations, government agencies, and educational institutions
Application Deadlines: Varies by RFP
Areas of Interest: The mission of the American Association of Retired Persons (AARP) Foundation is to serve vulnerable people 50 and older by creating solutions that help them secure the essentials — food, housing, income, and personal connection — and achieve their best lives.

Application Procedures: The Foundation's grant-making uses a Request For Proposals (RFP) process. Visit the Foundation's website for current RFP information.

First National Bank Alaska Corporate Giving Program
Marketing Department
101 West 36th Avenue, Suite 207
P.O. Box 100720
Anchorage, AK
99510-0720
Phone: 907-777-4362
Url: http://www.fnbalaska.com/235.cfm
Total Annual Giving: $1,000,000
Eligibility Requirements: Nonprofit organizations
Application Deadlines: Requests to the Donations Committee are reviewed monthly. Requests should be received at least two months prior to the date the funds are needed.
Areas of Interest: The First National Bank Alaska is committed to Alaska and Alaskans and to their economic and cultural growth. In addition to employee involvement, First National contributes funds to selected Alaska-based nonprofit organizations.
Application Procedures: Application guidelines and forms are available on the company's website listed above.

May and Stanley Smith Charitable Trust

c/o AdminiTrust LLC
2320 Marinship Way, Suite 150
Sausalito, CA
94965
Phone: 415-332-0166
Email: grantsmanager@adminitrustllc.com
Url: http://www.adminitrustllc.com/foundations/msset.htm
Primary Contact: Ms. Janet Ferraiolo, Grants Manager
Email: jferraiolo@adminitrustllc.com
Total Annual Giving: $10,729,000
Eligibility Requirements: Nonprofit organizations
Application Deadlines: None
Types of support include:
- general support;
- project support; and,
- capacity-building.
Application Procedures: Application guidelines are available on the website listed above.

The Farris Foundation

P.O. Box 304
Lawrenceville, GA
30046 -0304
Phone: 770-962-4448
Fax: 770-962-4430
Email: info@farrisfoundation.org
Url: http://www.farrisfoundation.org/
Primary Contact: Mr. Otis Jones, President
Total Annual Giving: $85,000
Grant Range: $100 - $20,000
Average Grant: $1,000 - $10,000
Eligibility Requirements: Nonprofit organizations and Christian ministries
Application Deadlines: None. Requests are reviewed quarterly.
Areas of Interest: The Farris Foundation serves as a "seed ministry" to help others help themselves and acts as a catalyst in helping launch struggling ministries.
The Foundation's basic objectives are to:
- support activities that encourage people to better themselves;
fund community projects that benefit the public at large, including projects that focus on children, seniors, and the physically and mentally challenged;

sponsor gatherings to promote Christian ideals and mores; and,

support Christian ministries and higher education throughout the world.

**Application Procedures:** Application guidelines are available on the Foundation's website.

**Frank M. Ewing Foundation**
5610 Wisconsin Avenue
PH20C
Chevy Chase, MD
20815 -4443
**Phone:** 301-656-7336
**Primary Contact:** Ms. Judith H. Ewing, Executive Vice President
**Total Annual Giving:** $429,000
**Grant Range:** $1,000 - $100,000
**Average Grant:** $5,000 - $25,000
**Eligibility Requirements:** Nonprofit organizations

**Application Deadlines:** The review process takes place each year in October. Requests should be received by the end of August to be considered. **The Foundation's areas of interest include:**

- children and youth
- the elderly
- social services
- hunger/homeless
- education
- health
- environment
- medical research
- animal welfare

General operating support and project support are provided.

**Application Procedures:** Interested applicants should submit a letter that describes the organization and the purpose for which funds are being requested. Also include a copy of the IRS tax-exempt letter.

**The Foster Foundation**
13 Central Way
Kirkland, WA
98033
**Phone:** 206-726-1815
**Email:** info@thefosterfoundation.org
**Url:** http://www.thefosterfoundation.org/
**Primary Contact:** Ms. Karen O. Rowe, Foundation Administrator
**Total Annual Giving:** $3,599,000
**Grant Range:** $1,000 - $125,000
**Grant Details:** Occasionally, larger grants are made.
**Eligibility Requirements:** Nonprofit organizations
**Application Deadlines:** Applications are accepted from January 1 to August 31, annually.

**Areas of Interest:** The Foster Foundation works to advance the quality of life for present and future Northwest generations. The Foundation supports nonprofit organizations in Alaska, Idaho, Montana, Oregon, and Washington, with a focus on the city of Seattle and neighboring communities.

**Application Procedures:** All interested applicants must submit a grant request using the Foundation's online application form.

**The Hearst Foundations**
300 West 57th Street
26th Floor
New York, NY
10019 -3741

**Phone:** 212-586-5404

**Fax:** 212-586-1917

**Email:** hearst.ny@hearstfdn.org

**Url:** http://hearstfdn.org/

**Primary Contact:** Mr. Paul Dinovitz, Executive Director

**Additional Contact Information:**
Address for requests west of the Mississippi:
William Randolph Hearst Foundations
90 New Montgomery Street
Suite 1212
San Francisco, CA 94105
415-908-4500
415-348-0887 (fax)

hearst.sf@hearstfdn.org

**Total Annual Giving:** $245,150,000

**Grant Range:** $50,000 - $100,000

**Eligibility Requirements:** Nonprofit organizations

**Application Deadlines:** None

**Application Procedures:** Application guidelines are available on the Foundations' website or may be requested from the address listed above. Organizations located east of the Mississippi should send requests to the New York office. Organizations located west of the Mississippi River should send requests to the San Francisco office.
9.9 PRIORITY: *Water and Sewer*

9.9.1 Project Description

**Background**
Only the school, clinic, washeteria, and teacher housing have complete piped water and sewer service.

**Water and Sewer Service Fees:**
- Laundry: $7-10 per load
- Showers: $3.50
- Water: $1/15 gallons
- Honey-bucket Haul Fees: $40 per month

Some homes have internal flush/haul septic systems. There are City honey-bucket bins available around town; overflow is a problem during spring melt. When honey-bucket haul fees are not paid, some people empty honey-buckets into cardboard boxes which stay frozen all winter but health hazards if not hauled away before they melt.

The water tank does not always maintain enough water for personal use and emergencies like fires. Residents must conserve water at certain times of the year. Most residents self-haul water.

Water is derived from a catch basin on the East side of the island that collects rainwater and snowmelt. It is treated and stored in a tank for both community and washeteria use. In the winter, drinking water is also obtained from ice chopped from ponds on the mainland on both the East and West sides of the inlet, five to seven miles from Sarichef Island. Other summer water sources include rainwater collected from the roofs, and hauling water from the Serpentine River.

**Upgrades since the publication of the last Shishmaref LEDP:**
- Almost 1/3 of homes have had flush toilet, sink, shower or a combination of these installed.
- The sanitation road has been improved so it is now faster and less bumpy driving to the sewage lagoon.

ANTHC has completed the Shishmaref Sanitation Master Plan which is shovel-ready when funded.

Shishmaref might get funding to protect sewage lagoon from storms. ANTHC was scheduled to look at the site on 12/13/12.

There’s funding for an AVEC waste-heat project for the City Garage where water and sewer transport equipment are stored along with the fire truck.
**Project Needs and Benefits**
- Adequate water storage tank capacity
- Adequate water source needed to supply homes with service
- Running water and sewer in homes
- Separate vehicles/equipment and personnel for hauling water and sewer

**Potential Constraints to Project Development**
Many of Alaska’s rural villages have inadequate water supplies and sewer systems. Funding sources for new water source development and water and sewer projects are competitive and limited. Most of the sewer and water funding goes to other communities where the needs are greater. Some funding sources may be reluctant to award grants to fund extensions to older homes or homes that are located in difficult places.

9.9.2 **Project Implementation**

**Plan of Action**
- Keep open communication with agencies like ANTHC about how the community can help move projects forward.
- Collaborate with RUBA, ANTHC, & NSHC to secure funding for sanitation infrastructure improvements in phases according to Shishmaref’s Sanitation Master Plan.
- Find out how other villages are getting similar things done.
- Hold local meetings to determine sewer and water needs and priorities based on which community projects are funded and scheduled to begin.
- With funds from Kawerak’s Grant Writer Assistance program hire a grant writer to identify funding sources and submit an application for design and construction funds.
- Make needs known.
  - Describe needs in writing; distribute description to Kawerak, decision makers, and legislators.
  - Hire a lobbyist to assist in securing funds through State of Alaska.

**Organizations Responsible and Contact Information**

1. **Native Village of Shishmaref**
   - PO Box 72110

10.0 Review and Update Process
The joint entities are encouraged to evaluate, revise, and update Shishmaref’s Top LEDP Priorities annually. New priorities, adopted by joint resolution, will then be attached to the five year LEDP.

11.0 Maps
Current map of Shishmaref are available through Kawerak’s Community Planning and Development program or Kawerak Transportation.

12.0 Public Participation
Public Planning Meetings
Public planning sessions were held on December 12, 13, and 14, 2012 to assess the community’s current assets and needs, and revise the community’s Local Economic Development Plan (LEDP). Participants identified development goals and priorities in line with the community’s values, strengths, and needs. Participant attendance numbered from 11 to 21 with an average daily attendance of about 15 community members. The general public was invited and encouraged to attend the meetings. Members of the Traditional Council, City Council and Staff, Native Corporation Board, and Youth Leaders were present at each meeting, showing diverse input from the community on future paths of development.

Joint Entities Review of LEDP Draft
Following the completion of the public planning meetings in December, 2012, the Tribal Council, the City Council, and the Native Corporation Board agreed to review the draft LEDP, edit if necessary, and adopt the plan by joint resolution.
